PROFESSIONAL SUMMARY

Results-driven Senior Software Developer with over 8 years of experience building scalable, high-performance applications across FinTech, cryptocurrency platforms, e-commerce, SaaS, healthcare, and real estate industries. Proven expertise in backend and frontend development using modern frameworks and cloud technologies.

Strong track record of leading Agile teams to deliver high-performance solutions, implementing cross-functional methodologies that improve system performance by up to 30%. Experienced in microservices architecture, API development, and DevOps practices with AWS cloud infrastructure

TECHNICAL SKILLS

Programming Languages & Frameworks: PHP, Laravel (Livewire, Vapor, Bref), TypeScript, JavaScript, Node.js, NestJS, Java(Springboot), Go

Frontend Technologies: React.js, Vue.js, Nuxt.js, [Inertia.js](#), Livewire, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend & API Development: RESTful APIs, GraphQL, Microservices Architecture, WebSockets, Server-Side Rendering

Databases & Storage: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis, AWS S3, Cloudinary, Database Optimization

Cloud & DevOps: AWS (Lambda, S3, RDS, API Gateway, CloudFormation, CloudWatch, IAM), Docker, CI/CD, GitHub Actions, Laravel Vapor, Infrastructure as Code

Testing & Quality Assurance: Test-Driven Development (TDD), PHPUnit, Pest, Jest, Mocha, Chai, Supertest, Unit Testing, Integration Testing

Development Methodologies: Agile, Scrum, Kanban, Code Review, Pair Programming, Continuous Integration, Continuous Deployment

Project Management & Leadership: Team Leadership, Technical Mentorship, Stakeholder Communication, Requirements Analysis, Performance Optimization

PROFESSIONAL EXPERIENCE

TUROG TECHNOLOGIES | Senior Software Developer

Feb 2025 - Present | Lagos, Nigeria

- Built 6 production-ready microservices (Laravel 11/Spring Boot) using event-driven design, multi-tenancy, and Clean Architecture, enabling high-throughput financial transactions.
- Core Banking System: Integrated Apache Fineract for client management, loan processing, and real-time reporting.
- Payments Engine: Led Bank-integrated processor handling bill payments, virtual accounts, and settlements.
- Identity & Security: Implemented WSO2 Identity Server for OTP/auth workflows, OAuth2/JWT for RBAC, and end-to-end encryption for PCI DSS compliance.
- AI-Powered Compliance: Automated document safety checks using Google Vision API (detecting adult/violence/spoof content in user uploads).

Technologies: Laravel 11, Spring Boot, WSO2 MSF4J, PostgreSQL, Redis, GCP (Vision API/Storage), OAuth2, JWT, Flyway

DATABYTES INTEGRATED SERVICES LIMITED | Consultant

Oct 2023 - Jan 2025 | Lagos, Nigeria

- Architect and develop RESTful API integrations between Sage ERP systems and client applications, serving 10+ enterprise clients
- Lead client consultation sessions to analyze integration requirements and deliver customized solutions within project timelines
- Implement serverless AWS Lambda functions, reducing operational costs by 40% while improving application scalability
- Design secure data transfer protocols ensuring compliance with financial data protection standards
- Troubleshoot and resolve complex integration issues, maintaining 99.5% system uptime
- Collaborate with cross-functional teams using Agile methodologies to deliver projects 20% faster than industry standards

Technologies: Laravel, Java (Springboot), Vuejs, Inertia.js, TypeScript, Node.js, Docker, AWS Lambda, Laravel Bref, Sage One, Sage 50, Sage 200, Sage 300, Sage X3

RIMSYS | Senior Software Developer

Sept 2022 - Sept 2023 | Pittsburgh, Pennsylvania, United States

- Contributed to the development of a world-leading Regulatory Information Management (RIM) SaaS platform serving medical technology companies globally
- Collaborated with regulatory affairs professionals to digitize and automate compliance workflows, reducing manual processing time by 50%
- Authored comprehensive OpenAPI documentation (Redocly), enabling seamless third-party integrations and developer onboarding
- Implemented secure document management system with AWS S3, handling 1,000+ regulatory documents monthly
- Contributed reusable npm package for custom HTML components using Vite and Storybook, adopted across company products
- Implemented advanced database indexing strategies, improving query response times by 30% across SQL and databases

Technologies: Laravel, PHPUnit, Nuxt.js, TypeScript, Node.js, Vue.js, Redis, Tailwind CSS, Docker, AWS, Laravel Vapor

PATRICIA TECHNOLOGIES LIMITED | Senior Software Developer

July 2019 - Sept 2022 | Vilnius, Lithuania

- Developed company-wide authentication client (NPM package) managing 5,000+ user sessions across multiple products.
- Designed and built a scalable microservices architecture for a cryptocurrency trading platform with high transaction volumes
- Architected HD Wallet system with 99.9% security compliance, supporting blockchain wallet creation, multi-signature protocols, and end-to-end encryption for PCI DSS
- Integrated multiple payment gateways (Paystack, Flutterwave, Paga Pay), for seamless fiat-to-crypto conversions, processing 7,000+ transactions monthly.
- Engineered dual wallet system (Fiat and Crypto) using a microservices, enabling instant fund transfers and crypto-to-crypto swaps without intermediary delays.
- Led an 8-person team building Patricia International E-commerce platform for gift card trading, serving 20,000+ users with real-time crypto/fiat exchange rates.
- Spearheaded bill payment service development (Airtime, Data, TV/Cable, Electricity) serving 10,000+ active users
- Conducted code reviews and mentored 12 junior developers, improving team code quality scores by 40%
- Optimized database performance by 30% through strategic query optimization and advanced indexing techniques
- Implemented Agile/Scrum methodologies, improving team velocity by 25%

Technologies: Laravel, PHPUnit, Node.js, Blockchain, React.js, TypeScript, Vue.js, Redis, MySQL, NoSql, Git, Docker, AWS

NETPLUSDOTCOM | Mid-Level Software Developer

May 2018 - June 2019 | Lagos, Nigeria

- Developed consumable web services enabling seamless payment processing for 50+ enterprise clients
- Engineered payment solutions integrating multiple gateways (Interswitch, Visa, MasterCard, GTBank, Nibbs) Built Real Estate applications streamlining bill payment and electricity token management for 6,000+ properties
- Implemented automated testing procedures, reducing bug occurrence by 45%
- Participated in Agile development cycles, delivering features 15% ahead of schedule

Technologies: Laravel, PHPUnit, Node.js, React.js, Jest, TypeScript, MySQL, Git, Docker

MUTUAL BENEFITS MICROFINANCE BANK | Junior Software Developer

Sept 2017 - May 2018 | Lagos, Nigeria

- Implemented secure payment gateway integrations in banking web applications
- Developed a comprehensive bank web application using ASP.NET, serving 8,000+ customers
- Conducted thorough unit testing and debugging, ensuring 99% application stability
- Collaborated with business analysts to implement customer-requested features using Agile methodology
- Maintained and optimized database performance, ensuring smooth operations

Technologies: ASP.NET, xUnit, Laravel, PHP, Node.js, Jest, TypeScript, MySQL, Git

SYSTEMSPECS NIGERIA LTD | Software Developer Intern

June 2014 - Dec 2014 | Lagos, Nigeria

- Designed and developed responsive websites and web applications using PHP and WordPress
- Led company website redesign project, improving user engagement by 60%
- Developed Computer-Based Testing/Exam System serving 1,000+ students
- Performed comprehensive unit testing and debugging of applications
- Collaborated with senior developers, learning industry best practices and coding standards

Technologies: PHP, WordPress, MySQL, HTML, CSS, JavaScript

KEY PROJECTS & ACHIEVEMENTS

FinTrack-Ledger | Financial Management SaaS

Comprehensive financial tracking and ledger management tool with real-time expense monitoring, automated invoicing, payroll management, and detailed analytics reporting. Scalable SaaS solution supporting businesses from startups to enterprises.

Technologies: Laravel, RESTful API, MySQL, Docker, PHPUnit, Redis

DreamMaps | Learning Management System

Complete LMS platform with student skill tracking, role-based access control, structured onboarding workflows, and comprehensive progress analytics.

Technologies: Vue.js, Inertia.js, Laravel, MySQL, Tailwind CSS

Patricia Auth Client | NPM Package

Enterprise-grade authentication management package enabling single sign-on across company products with advanced security features.

Technologies: Node.js, TypeScript, Redis, JWT

Smart City EKO | Microservices Architecture

Built and managed 4 microservices (Authentication, Profile, Domain, Access) supporting smart city initiatives with scalable, secure architecture.

Technologies: Lumen PHP, ASP.NET Core, Node.js, Redis, Docker

EDUCATION

Bachelor of Science in Computer Science

Federal University of Agriculture, Abeokuta (FUNAAB) | 2011-2015, Nigeria

LANGUAGES

English: Native Speaker
